

ESG investments

Training program SAM

Title / Topic	ESG investments
Target audience	Asset managers
Learning content	Over the last few years, global sustainability has gained significant traction, although its concerns are not recent. Already in the last century, there were many public disconformities and manifestations on the adverse effects on society caused by issues like war, human rights violations, industrial pollution, and corruption. Together with climate change, pandemics, and the rapid growth of the world's population, these challenges must be addressed globally. This concerns the entire economy including finance and asset management. It is essentially about taking the environmental, social and governance (ESG) consequences and impacts into account in investment and credit decisions, as a complement to financial factors.
Learning location / Testing location	Fintelligence Online Learning Platform: https://vpbank-eam.fintelligence-net.com/
Learning time	1. ESG investments (50 min) 2. Learning control (20 min)
Period	2 Months
