

E-learning offer on the Swiss Federal Act on Data Protection (FADP)

The attractive FADP e-learning and e-testing programme for employees in the financial services industry provides the essential knowledge about the revised Swiss Federal Act on Data Protection to ensure that data is handled in compliance with the law.

The FADP online Library comprises of three modules. The introductory module describes the aim and purpose of the Federal Act on Data Protection, the most important principles of data processing and important measures to ensure data security. The second module describes the main rights and obligations under the Federal Act on Data Protection.

Finally, the concluding module deals with the data protection legislation in the European area from a Swiss companies' perspective and the enforcement of relevant data protection laws. The modules build on each other and enable employees to gain fundamental specialist knowledge immediately.

The e-learning contains a variety of interactive elements, including illustrations, graphics, videos and links to relevant sources. Participants can access the platform any time and learn independently of time and place. In addition, you can continuously check learning progress by conducting tests.

Your benefit

- You will get to know the principles of the revised Swiss Federal Act on Data Protection in an intuitive and straight-forward way.
- The modular structure enables hands-on learning, independent of time and place. The modules are attractively designed and include various interactions, web links, examples and scenarios.
- Online self-tests ensure that you have understood the content and can apply it.
- With FADP e-learning and e-testing you meet the legal and regulatory requirements.

Target audience

Client advisors in banking, asset management, credit management and other financial services; financial specialists and middle and back office employees.

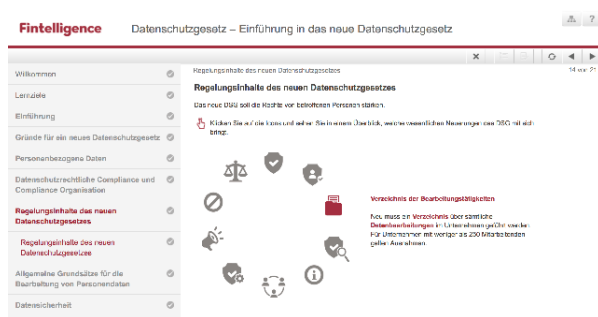

Accreditation

The online modules are accredited by the Swiss Association of Quality (SAQ) as recertification measures.

Content

- Data protection law in Switzerland: Background and purpose
- Organisation and Data Protection Compliance
- Obligations of the data processor
- Rights of a person affected by data processing
- EU data protection law (GDPR)
- Swiss data protection law in relation to EU data protection law
